I agree with Laura. Is there anyway to find out their schedule for putting these out for the rest of the rodenticides? The one they put out for bromethalin has the potential to hurt us depending on how they write it.

Hi Carol and Darlene,

The bromadiolone fact sheet seems fine to me.

I don't believe that it says anything controversial, which is to say that I don't think IO and OGC review is necessary, but Neil or Rusty may disagree.

Thanks for the cc;, Darlene.

Rusty, Laura and Neil, should Kelly and possibly OGC also review NPIC's draft bromadiolone fact sheet?

Thanks,
Carol

Subject: FW: new NPIC general fact sheet on Bromadiolone

Hi Rusty, Laura and Neil,

Thanks again for reviewing and providing comments on the rodenticides letter from the veterinarian.

I'm writing to make you aware of the attached fact sheet on the anticoagulant bromadiolone. The National Pesticide Information Center (see web link below) created this fact sheet to post on their web site under the Topic Fact Sheets page (see link below). As you may know, NPIC has a cooperative agreement with EPA/OPP to provide pesticide-related information to the public. As part of the agreement, NPIC must provide EPA draft copies of their chemical topic fact sheets for review before they post them on the web. The purpose is to provide the agency the opportunity to point out any inaccuracies and to ensure that NPIC is not saying anything that is contrary to our message on a particular topic.

Please let me know if you are interested in giving the fact sheet a cursory review. Our comments aren't due to NPIC until September 3.

Subject: new NPIC general fact sheet for optional review/ New RFA up

Hello NPIC team,

Attached is a new fact sheet from NPIC for optional review. If you or your colleagues have feedback, please let me know by Friday August 23.

Also, the new RFA has been posted! I greatly appreciate all the ideas and thoughts from many of you regarding this work. We were not able to go forward with funding above the current level, so we were not able to add on new aspects to the program at this time. The program period will be for five years. If you would like to look at the RFA, here is the link.

Thank you again,

Emily

Hi Emily-

I am pleased to forward a draft of the new bromadiolone general fact sheet for EPA review. If you have any questions, please let me know. Thanks!

Dave
